Information Sheet - Feeding Guidelines for Palastart Lamb & Kid

Recommended feeding rates for lambs & kids only. Prior to commencement of feeding to other animals please consult your local vet.

Palastart Milk Replacers are suitable for all types of animals.

Age of Animal	Number of FEEDS per day	Volume per FEED
1 - 3 days*	6	100 ml Add 220 grams of powder per litre.
4 - 7 days	4	250 ml Add 220 grams of powder per litre.
8 - 21 days	4	350 ml Add 220 grams of powder per litre.
21 to weaning	2	500 ml Add 220 grams of powder per litre.

**Where possible colostrum and transition milk should be fed for the first two (2) days (See PBIS Colostrum feeding).*

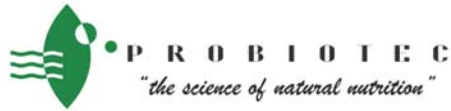

Important.

- Feeding guidelines are based on average weights for newborn animals.
- Smaller animals will require a smaller volume per feed.
- Do not over feed.
- Bloat can occasionally occur due to gorging and over feeding.
- Prevention of bloat includes more frequent, smaller feeds and introducing a drink of water between feeds.

Feeding.

- When feeding lambs and kids feed at the same time each day.
- Feed the milk replacer at the same temperature each feeding.
- Changes to feeding volume and concentration should be made gradually.
- Clean fresh water should be available at all times.
- Good quality pellets or concentrates should be available ad lib from day seven (7).

Mixing.

- Mix the required quantity of powder (220 grams) with one (1) litre of warm water to obtain the correct concentration for milk replacer.
- Fill the container with the required volume of clean warm water and slowly add the powder.
- Stir vigorously.
- Continue stirring until all of the powder and lumps have dissolved.
- Use as soon as possible after mixing.

For Further information on any of the points mentioned above contact your Palastart representative on 1800 067 919.
